

Here's a snapshot of an AI Lead Triage Agent I built in Zapier: it classifies leads by hot/warm/cold using OpenAI, then routes them into tailored follow-up flows.

Logic flow: Gmail → intent detection → lead classification → Google Sheets + draft reply.

Examples of Final Output:

Re: feature request

Re: feature request

Thanks for reaching out about this feature.

Our team can provide more detail and schedule a walkthrough next week.
